# 7.1- Working through a dispatched order

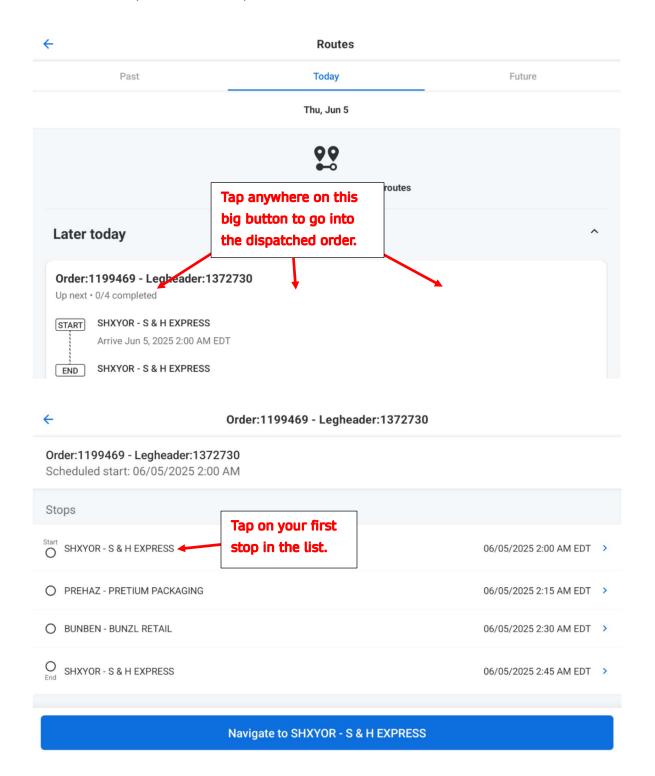

You will receive a pop-up when an order has been dispatched to you. You can certainly tap this pop-up now to go directly to the order. If you miss or close this pop-up, your dispatched order can be located by tapping on the Routes button.

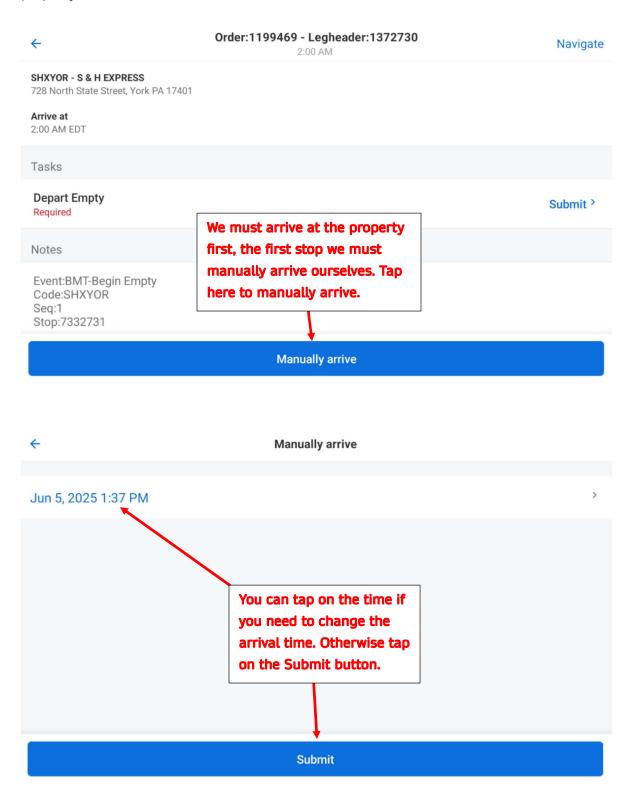

Now that we have our order number, we should add it to our Form & Manner. It is important to always keep your Form & Manner as up to date as possible with what you currently have going on. On the Samsara home screen tap on the vehicle info box or Vehicle button to edit information in the form & manner \*see 5.2 – Editing Your Form & Manner \*

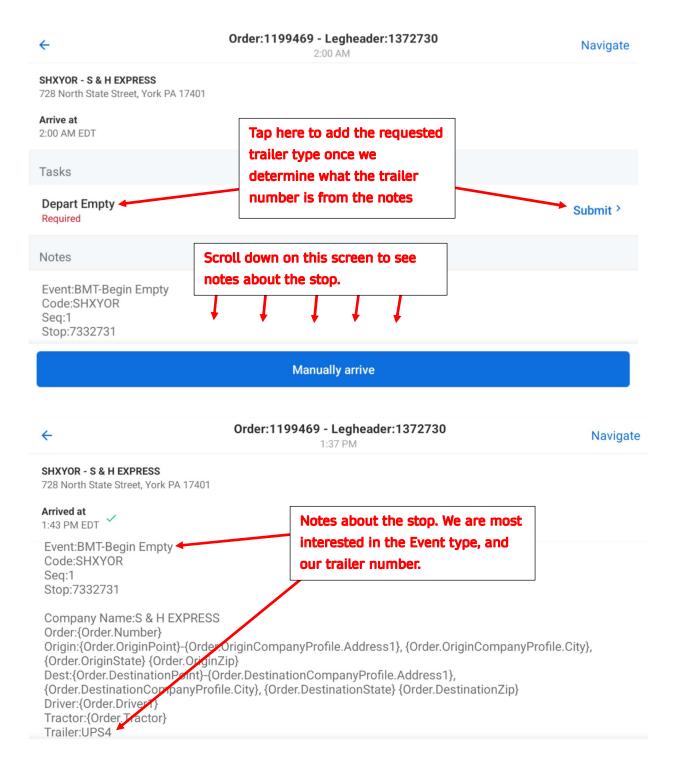

Go back to the Samsara home screen and tap on the Routes button. We see our order as a button listed for Today's Routes. Tap anywhere on this order button to continue. We will see the stops listed for our order. Tap on the first stop to continue.

These items must be completed in a realistic order. First we must arrive to a property. Once we are at the property we can deal with any trailers we need to deal with while we are at that property. Then we must depart that property to arrive at a new property. When you cross a Geo-Fence (Invisible GPS line that indicates your arrival/departure) you will be automatically arrived and departed. The first stop we must manually arrive ourselves as we are already located at the property.

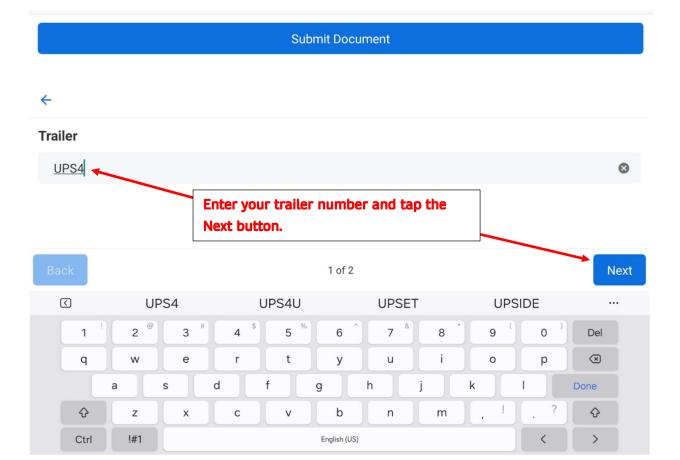

Now that we have arrived at the property, we can deal with any trailers that we need to deal with while we are at this property. If we scroll down the screen of the stop we can see some notes about the stop. The key items we are interested in are what kind of event is happening with the trailer at this stop (empty, bobtail. loading, unloading, etc...) and what is our trailer number. If we hook or unhook from a trailer we must remember to update our Form & Manner \*Section 5-2\* on the Samsara home screen.

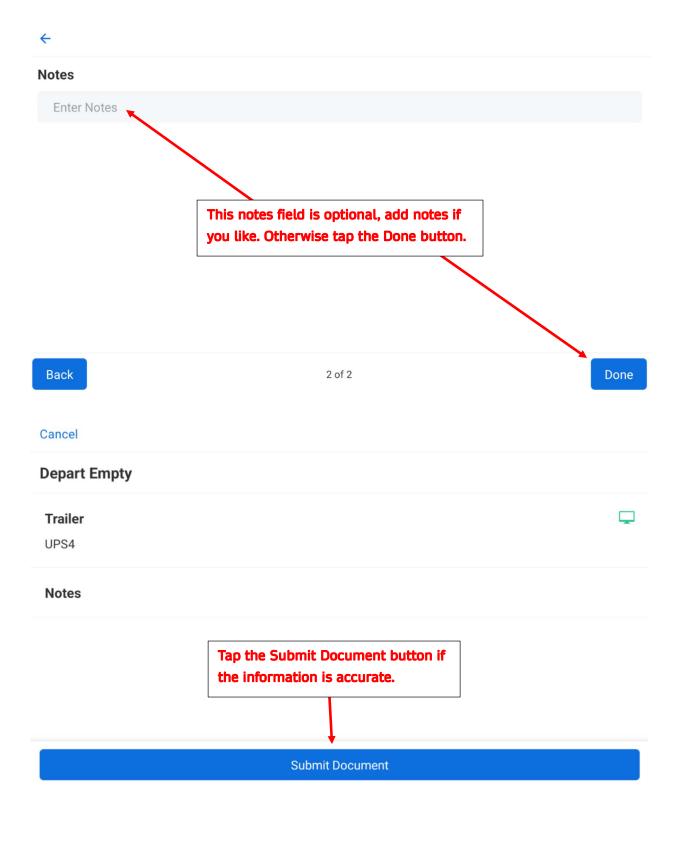

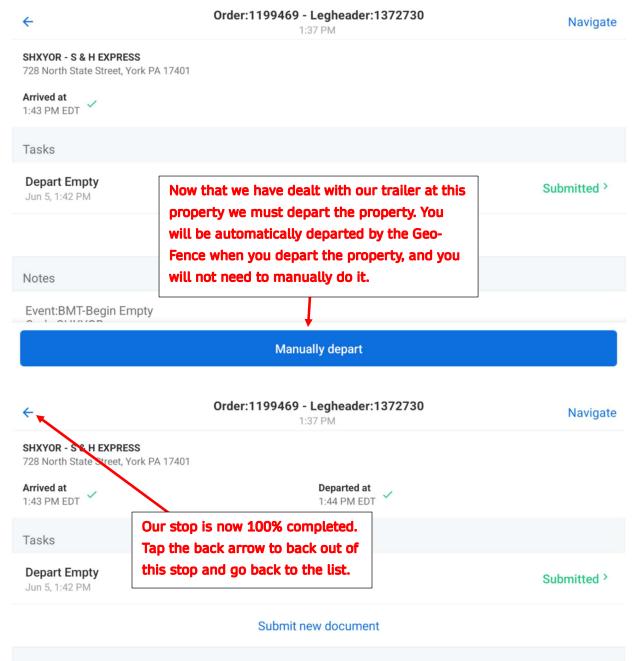

# **Depart Empty**

## Notes

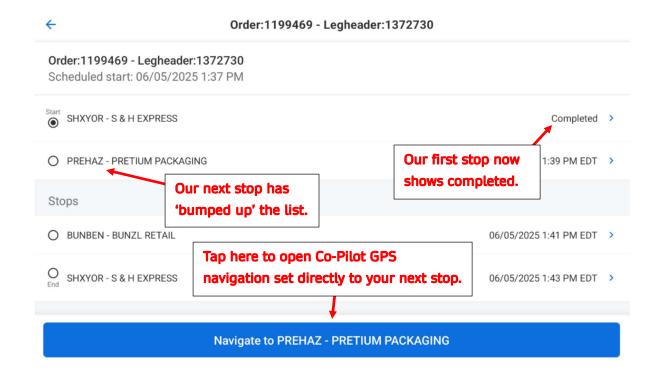

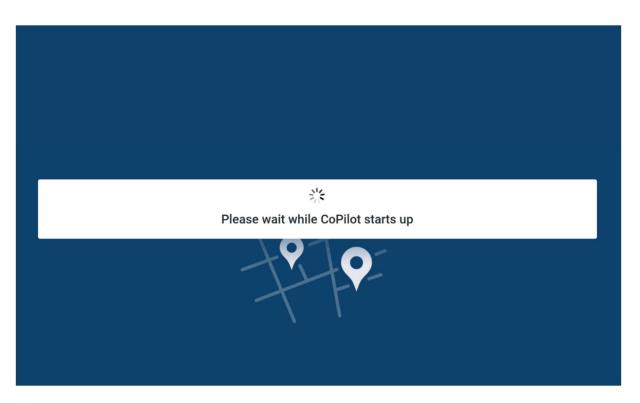

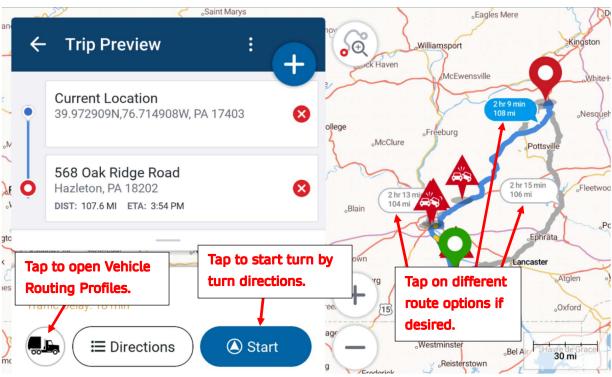

#### Notes

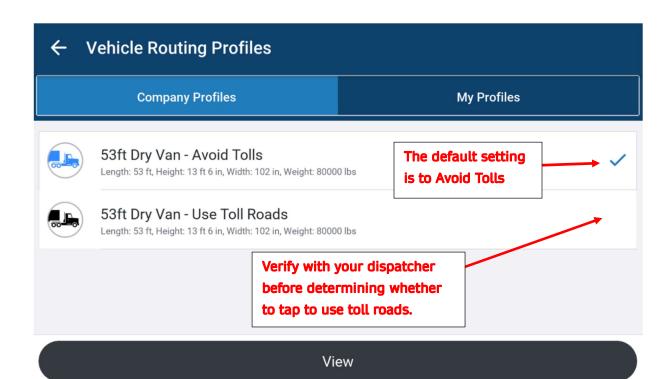

Event:BMT-Begin Empty Code:SHXYOR Seq:1 Stop:7332731 Our first stop on the list now shows completed. Our next stop has 'bumped up' the list. The navigation button along the bottom has updated to our next stop. Tap on this button to open the Co-Pilot GPS navigation.

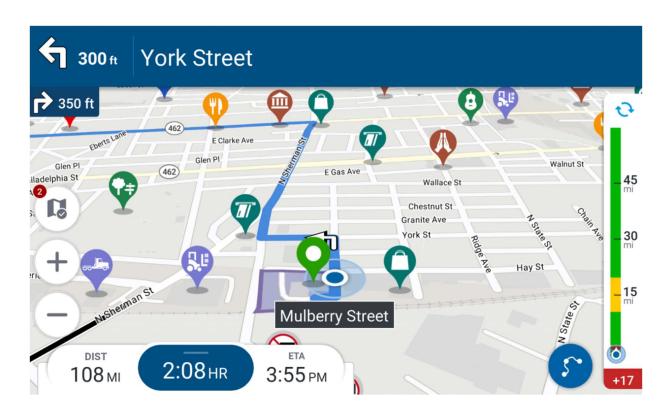

You will see a loading screen as CoPilot starts up. Once it opens up you will see the map with some route options to your destination, tap to select a route option if desired, and tap the Start button to begin the turn by turn navigation. Tapping the black truck icon opens up the Vehicle Routing Profiles menu that allows you to switch the navigation between avoiding and using toll roads (The default is to avoid tolls, please verify with your dispatcher before determining whether to use any toll roads) Additionally this screen lists our truck specifications, if you have or decide to get a 2<sup>nd</sup> GPS unit in the future, you do want to ensure that it is set to our truck specifications to avoid any misrouting.

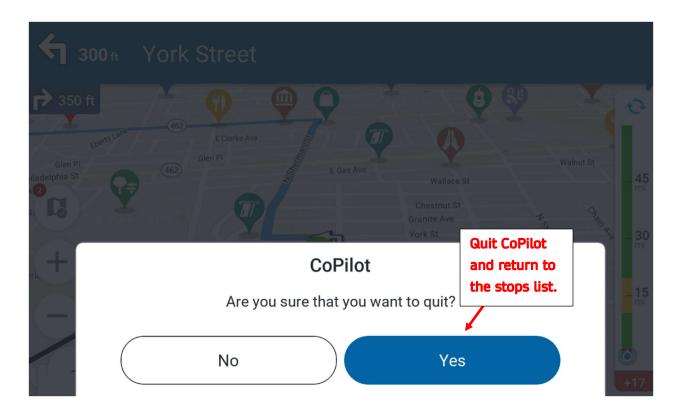

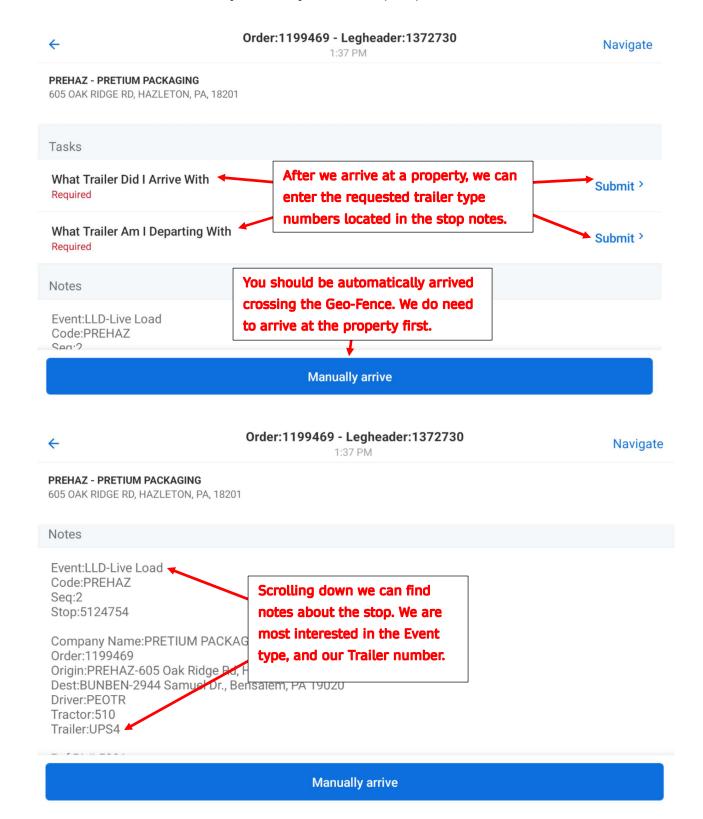

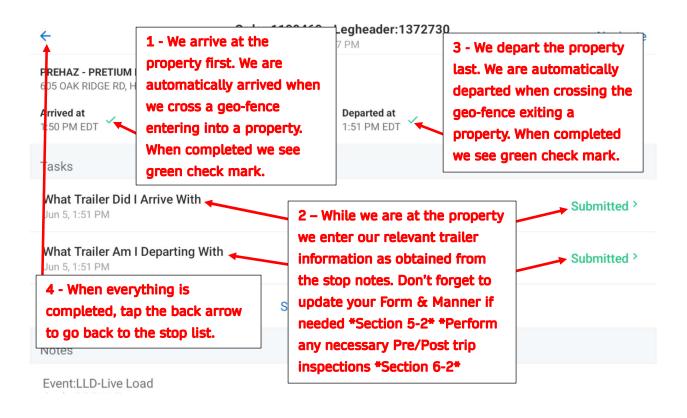

Tap on the physical back arrow \*Section 1.2\* located on the front screen of the tablet for CoPilot to prompt you to quit.

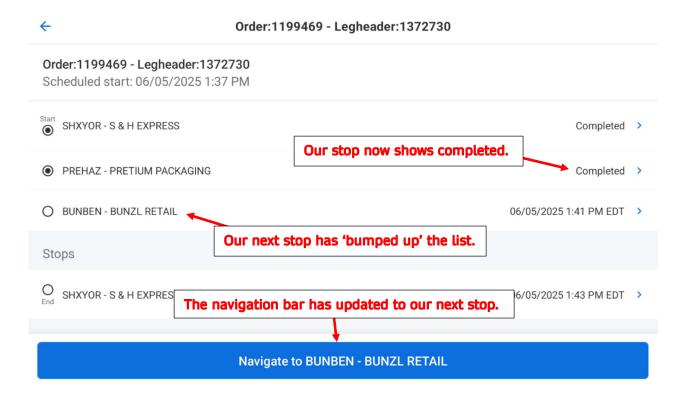

You should be automatically marked as arrived when crossing the Geo-Fence into your next stop. Once you have arrived at the stop, you can scroll down to review notes about the stop (Event type / Trailer number) We can then use this information to deal with any trailers we need to deal with while we are at this property. Tap and enter your trailer information (If you do hook or unhook a trailer, you must go back to the Samsara home screen and ensure that your Form & Manner is up to date \*Section 5.2\* Perform any necessary Pre/Post trip inspections Section 6-2\*

After all our information is entered and we verify our form and manner is correct. We can depart the property. You will be automatically departed crossing the Geo-Fence exiting the property.

any necessary Pre/Post trip

Now that our order is 100% complete and we are back at the yard, we can go into the form and manner, remove the order number and proceed to 7-2- Exiting & Logging out of Samsara, if we are done for the day.

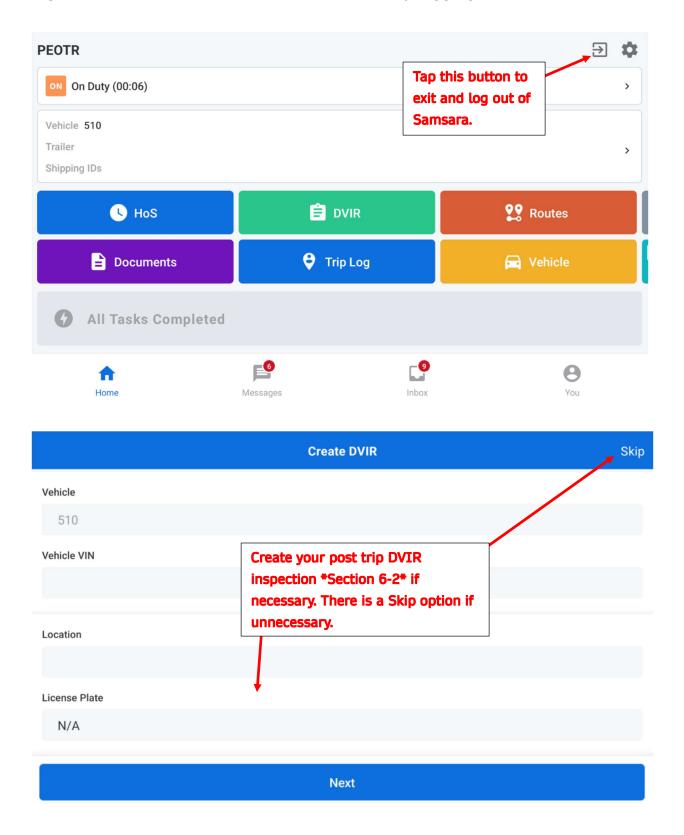

## Assignments

# 7.2- Exiting & logging out of Samsara

When it is time to go off Duty, you do want to select the Icon on the top right corner of the Samsara home screen to exit/log off and go off duty. It is important to do this every day, as this allows Samsara to do updates, and to rectify your log/drive time data. You will then start a new day logging in fresh.

When logging out Samsara will check for unassigned driving time, this may occur if you didn't have a strong wireless signal when driving. Review if anything is found here. Samsara will then check for uncertified logs, it will only prompt to certify logs that are from yesterday or prior \*Section 5-3\*
